

The worldwide standard in mechanical piping systems

More than 80 years of piping systems solutions

Since 1925, Victaulic has been at the forefront of mechanical piping systems innovation, providing numerous patented piping related products that are in use today in multiple markets around the world. And they all stem from one basic concept; the original grooved end mechanical pipe joining system and a steady stem of innovation from Victaulic. The Victaulic grooved end piping system is the most versatile, economical and reliable mechanical pipe joining system available.

Victaulic Aquamine Products

SERIES 2900

SEE VICTAULIC PUBLICATION 10.01 FOR DETAILS

The Victaulic Aquamine line of reusable PVC products is the fastest, easiest and most economical method for joining PVC pipe for water services.

Ranging in size from 2 to 12"/50 – 300mm for pressures up to 350psi/2400kPa Victaulic Aquamine products are joined by inserting a spline into the groove provided with each product. Ideal for water supply, water bypass, dewatering lines and other water services these products can easily be reused and redeployed as needed.

The complete Victaulic Aquamine line consists of pipe, couplings, fittings, and valves available with a variety of end connections.

PATENTED

MATERIAL SPECIFICATIONS

Pipe: PVC 1120 type 1, grade 1 (class 12454) conforming to ASTM D-1784 and ASTM D-2241.

Couplings: PVC 1120 type 1, grade 1 (class 12454) conforming to ASTM D-1784 and ASTM D-3139

Fittings: PVC 1120 type 1, grade 1 (class 12454) conforming to ASTM D-1784 and ASTM D-2241

Valves:

Housing: Ductile iron conforming to ASTM A-536, grade 65-45-12

Body: PVC 1120

Disc: Ductile iron conforming to ASTM A-536, grade 65-45-12. Grade "T" Nitrile rubber encapsulated disc conforms to ASTM D-2000.

O-Rings: Polyisoprene (IR) conforming to ASTM F-477

Spline: Nylon. For higher pressure services Nylon 66 is used.

AQUAMINE® BUTTERFLY VALVE

The Aquamine® butterfly valve is designed for use with Aquamine system components for pipe sizes ranging from 2 – 6”/50 – 150mm. Series AQP valves are rated for 250psi/1725kPa at 73°F/23°C to provide reliable, leak-free, dead-end service.

PERFORMANCE

Victaulic Aquamine Products

SERIES 2900

SERIES 2970 AQUAMINE® PLAIN END PIPE COUPLING

The Aquamine® plain end pipe repair and access coupling provides the convenience of bolted mechanical assembly of Aquamine PVC pipe. There is no pipe preparation; no solvent cement mess or cure time.

The rugged ductile iron housing has patented, specially formed integral gripping teeth which engage into the pipe to secure it as the bolts are tightened metal-to-metal. Couplings are rated to 350 psi working pressure, or the working pressure of the Aquamine pipe, whichever is lower.

EXAGGERATED FOR CLARITY

Housing – Durable ductile iron body for rugged service conditions. Integral gripping teeth provide connection to the pipe. Rust-resistant blue enamel finish is standard. The ductile iron body conforms to ASTM A-536.

Pre-lubricated Gasket – Elastomer gasket with triple seal design provides a leak free seal for a wide variety of services. The gasket is pre-lubricated to speed and ease assembly. The Grade "T" nitrile gasket is suited for ambient water and petroleum services. (Always refer to pipe manufacturer's data for temperature and pressure ratings.)

Bolts/Nuts/Washers – Zinc plated carbon steel bolts and nuts are supplied standard with Aquamine plain end couplings. The four bolt assembly speeds installation versus solvent cement assembly or the multiple bolts required for flanged connections. Bolts have a minimum tensile strength of 110,000 psi. All sizes are supplied with hardened steel washers meeting ASTM F-436 Type 3 (weathering steel).

(2" / 50 mm size has one bolt per side.)

Pipe Inches mm		Coupling Dimensions Inches mm			Bolt/Nut No. – Size Inches	Approximate Weight Each Lbs kg

* Working pressure and End Load are total, from all internal and external loads, based on proper coupling assembly with bolts pads metal-to-metal, on Aquamine PVC pipe. Couplings are designed to be used with plain end pipe.

Metric thread size bolts (plated) are available (color coded) for all coupling sizes upon request. Contact Aquamine for details.

WARNING: Piping systems must always be depressurized and drained before attempting disassembly and removal of any Aquamine piping products.

Victaulic Aquamine Products

SERIES 2900

SERIES 2972 AQUAMINE® PLAIN-END PVC TO GROOVE TRANSITION COUPLING

The new Aquamine® Style 2972 transition coupling provides the convenience of bolted, mechanical assembly for plain-end PVC pipe to grooved-end steel pipes, valves, and fittings. This coupling allows you to join shorter sections of PVC pipe, or insert fittings and valves into a pipe section without having to use special adapters.

2" Size

3 - 8" Sizes

Pipe Size		Dimensions Inches mm			Bolt Data

SERIES 2971 AQUAMINE® PLAIN-END PVC TO HDPE TRANSITION COUPLING

The Aquamine® Style 2971 transition coupling provides the convenience of bolted, mechanical assembly of plain-end PVC pipe, such as Aquamine, to plain-end high-density polyethylene (HDPE)/polybutylene pipe without special adapters. There is no solvent cement mess or lengthy cure times, and no butt fusion equipment is necessary.

(2"/50mm size has one bolt per side.)

AE1800 AIR RELEASE VALVE

Series AE1800 Air release valve safely bleeds air from the piping system.

APG – AQUAMINE GROOVING TOOL

The APG is a manually operated tool used for producing a cut spline groove and beveled end on 4 - 12"/ 100 - 300mm Aquamine pipe to prepare the pipe to receive an Aquamine coupling. It is an orbital tool which is rotated around a stationary, secured pipe. The tool may be operated on pipe held in a pipe vise or on supported in-place piping that is depressurized and drained.

Victaulic Aquamine Products

SERIES 2900

TYPICAL SPECIFICATION FOR AQUAMINE PIPING SYSTEM

1.0 SCOPE

This specification covers the requirements for a reusable, spline-connected, high impact polyvinyl chloride (PVC) piping system as manufactured by Aquamine, LLC (a Victaulic Company).

The pipe and couplings used in this system shall be listed in NSF Certified Product Listing under Standard 61, for potable water (health effects) and designated as NSF-61.

NOTE: The Aquamine PVC piping system is not to be used in compressed air and gas service.

2.0 PIPE

Pipe shall be Aquamine high impact type manufactured from a special formulation of PVC 1120 defined as type 1, grade 1 (class 12454) according to ASTM D-1784 and shall contain impact modifiers and ultraviolet inhibitors to enhance long-term performance.

Pipe shall be designed to meet all PVC pipe requirements as specified in ASTM D-2241. Each pipe end shall be grooved to be connected using a specially designed coupling and spline.

Pipe shall be listed under NSF Standard 61 for potable water (health effects) and designated as NSF-61.

3.0 COUPLINGS

Couplings shall be Victaulic Aquamine brand made from a special high impact formulation of PVC 1120 (type 1, grade 1 or class 12454 according to ASTM D-1784). Couplings shall be designed to meet ASTM D-3139 standards for joints for plastic pressure pipes using flexible elastomeric seals.

Couplings shall provide a restrained joint by means of a nylon spline inserted into the space created when the groove on the pipe and the interior groove in the coupling are aligned.

Couplings shall contain a pre-lubricated permanent type O-ring seal on each end for a watertight hydraulic seal. The O-rings shall meet ASTM F-477 (Standard Specification for Elastomeric Seal for Joining PVC Pipe).

Couplings shall be listed under NSF Standard 61, for potable water (health effects) and designated as NSF-61.

4.0 FITTINGS

Fittings shall be manufactured by Aquamine, LLC with spline-grooved ends for use with Aquamine pipe and couplings.

5.0 VALVES

Valves shall be Aquamine AQP Series butterfly valves, rated 250 psi at 73°F/1725kPa at 23°C.

NOTE: Operating pressure is reduced at temperatures greater than 70°F. Ductile iron (ASTM A-536, grade 65-45-12) housing, PVC 1120 body. Ductile iron disc, rubber encapsulated with Grade "T" Nitrile compound conforming to ASTM D-2000 designation 5BG615A14B24.

6.0 ASSEMBLY

Assembly of Aquamine couplings and pipe shall be in accordance with the latest revision of the Aquamine Assembly and Installation Instructions AM-I-100.

Coupling

STYLE 31

SEE VICTAULIC PUBLICATION 10.01 FOR DETAILS

Style 31 couplings are designed to provide a strong component for ductile iron pipe systems of AWWA dimensions. The Style 31 coupling is designed for use on radius cut grooved pipe with minimum wall thickness of ANSI/AWWA C151/A21.51, Class 53. The Style 31 FlushSeal® gasket is specifically designed for ductile pipe surfaces and provides an efficient triple seal. Rigid radius grooved ductile iron systems with Style 31 couplings are comparable with flanged ductile iron systems.

The outside surface of pipe between the groove and pipe end must be smooth and free from deep pits or swells to provide a leak-tight seal for the Victaulic gasket. All rust, loose scale, oil, grease and dirt shall be removed. Peened surfaces may require corrective action in order to provide a leak-tight gasket seal.

Sizes 3 – 12"/80 – 300mm are two-piece housings, with 14 – 20"/350 – 500mm sizes cast in four identical segments and 24 – 36"/650 – 900mm in six segments, to assure concentricity and easy handling.

All sizes are supplied painted, with plated nuts and bolts.

PATENTED

MATERIAL SPECIFICATIONS

Exaggerated for Clarity

Housing: Ductile iron conforming to ASTM A-536, grade 65-45-12. Ductile iron conforming to ASTM A-395, grade 65-45-15, is available upon special request.

Housing Coating: Couplings are alkyd-phenolic primer (2.5 mil)

Optional:

- Orange enamel
- Coal tar epoxy coating (3 mils)
- Organic zinc primer (3 mils)
- Bituminous coating
- Others available, contact Victaulic

Gasket (specify choice*):

Grade "M" FlushSeal

Halogenated Butyl (Brown color code). Temperature range –20°F to +200°F / –29°C to +93°C. Specially compounded to conform to ductile pipe surfaces. Recommended for water service within the specified temperature range plus a variety of dilute acids, oil-free air, and many chemical services. UL classified in accordance with ANSI/NSF 61 for cold +86°F/+30°C potable water service. NOT RECOMMENDED FOR PETROLEUM SERVICES.

Grade "S" FlushSeal

Nitrile (Red color code). Temperature range –20°F to +180°F / –29°C to + 82°C. Specifically compounded to conform to ductile pipe surfaces. Recommended for petroleum products, air with oil vapors, vegetable and mineral oils within the specified temperature range; except hot air over +140°F/+60°C and water over +150°F/+66°C. NOT RECOMMENDED FOR HOT WATER SERVICES.

* Services listed are General Service Recommendations only. It should be noted that there are services for which these gaskets are not recommended. Reference should always be made to the latest Victaulic Gasket Selection Guide for specific gasket service recommendations and for a listing of services which are not recommended.

Bolts/Nuts: Heat-treated plated carbon steel, trackhead meeting the physical and chemical requirements of ASTM A-449 and physical requirements of ASTM A-183.

Optional: Type 316 Stainless Steel, Grade B-8M, Class 2

‡ For class 53 pipe rating is 150 psi (1035 kPa). For larger couplings contact Victaulic.

* Working Pressure and End Load are total, from all internal and external loads, based on AWWA class 53 (except where noted) ductile iron pipe radius cut grooved in accordance with ANSI/AWWA C-606 specifications. Contact Victaulic for performance on other pipe. WARNING: FOR ONE TIME FIELD TEST ONLY, the Maximum Joint Working Pressure may be increased to 1 ½ times the figures shown.

† Allowable Pipe End Separation and Deflection figures show the maximum nominal range of movement available at each joint for pipe prepared to flexible radius cut grooved specifications. Pipe cut grooved to rigid specifications is essentially rigid and does not permit expansion and contraction.

@ Number of bolts required equals number of housing segments. Metric thread size bolts are available (color coded gold) for all coupling sizes upon request. Contact Victaulic for details.

WARNING: Depressurize and drain the piping system before attempting to install, remove, or adjust any Victaulic piping products.

Coupling

STYLE 31

WARRANTY

Refer to the Warranty section of the current Price List or contact Victaulic for details.

NOTE

This product shall be manufactured by Victaulic or to Victaulic specifications. All products to be installed in accordance with current Victaulic installation/assembly instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.

INSTALLATION

Reference should always be made to the I-100 Victaulic Field Installation Handbook for the product you are installing. Handbooks are included with each shipment of Victaulic products for complete installation and assembly data, and are available in PDF format on our website at www.victaulic.com.

For complete contact information, visit www.victaulic.com

Standard Flexible Coupling

STYLE 77

Style 77 couplings are designed with cross-ribbed construction to provide a strong component for pressure piping systems. Sizes ¾ – 12”/20 – 300 mm are two-piece housings. For 14 – 24”/350 – 600 mm sizes, Victaulic offers the Advanced Groove System (AGS) line of products. Request publication 20.03 for information on the flexible Style W77 AGS coupling.

All sizes are provided with plated bolts and nuts. Galvanized and stainless steel housings are also available.

Independent testing has shown the Style 77 coupling to be an effective stress relief and vibration attenuation device providing performance superior to braided steel and elastomeric arch-type connectors when used in close proximity to the source of vibration. Refer to 26.04 for vibration information.

Independent testing has shown that Victaulic Style 77 flexible couplings provide exceptional functionality during and after earthquake conditions. Refer to 26.12 for further information.

Exaggerated for clarity

MATERIAL SPECIFICATIONS

Housing: Ductile iron conforming to ASTM A-536, grade 65-45-12. Ductile iron conforming to ASTM A-395, grade 65-45-15, is available upon special request.

Housing Coating: Orange enamel.

- **Optional:** Hot dipped galvanized and others.

Coupling Gasket: (specify choice*)†

- **Grade “E” EPDM (All other sizes)**

EPDM (Green color code). Temperature range –30°F to +230°F/–34°C to +110°C. Recommended for hot water service within the specified temperature range plus a variety of dilute acids, oil-free air and many chemical services. UL classified in accordance with ANSI/NSF 61 for cold +86°F/+30°C and hot +180°F/+82°C potable water service. NOT RECOMMENDED FOR PETROLEUM SERVICES.

- **Grade “T” nitrile**

Nitrile (Orange color code). Temperature range –20°F to +180°F/–29°C to +82°C. Recommended for petroleum products, air with oil vapors, vegetable and mineral oils within the specified temperature range. Not recommended for hot water services over +150°F/+66°C or for hot dry air over +140°F/+60°C.

* Services listed are General Service Recommendations only. It should be noted that there are services for which these gaskets are not recommended. Reference should always be made to the latest Victaulic Gasket Selection Guide for specific gasket service recommendations and for a listing of services which are not recommended.

Bolts/Nuts: Heat-treated plated carbon steel, trackhead meeting the physical and chemical requirements of ASTM A-449 and physical requirements of ASTM A-183.

- **Optional:** Type 316 stainless steel, Grade B-8M, Class 2.

† Supplemental lubricant is recommended for services installed at or continuously operating below 0°F/–18°C.

§ Couplings 8, 10, 12, 200, 250, 300 mm sizes available to JIS standards. Refer to Section 06.17 for details.

* Working Pressure and End Load are total, from all internal and external loads, based on standard weight (ANSI) steel pipe, standard **roll** or **cut** grooved in accordance with Victaulic specifications. Contact Victaulic for performance on other pipe.

WARNING: FOR ONE TIME FIELD TEST ONLY, the Maximum Joint Working Pressure may be increased to 1½ times the figures shown.

† Allowable Pipe End Separation and Deflection figures show the maximum nominal range of movement available at each joint for standard **roll** grooved pipe. Figures for standard **cut** grooved pipe may be doubled. These figures are maximums; for design and installation purposes these figures should be reduced by: 50% for ¾ – 3 ½"/20 – 90mm; 25% for 4"/100mm and larger.

@ Number of bolts required equals number of housing segments.

Metric thread size bolts are available (color coded gold) for all coupling sizes upon request. Contact Victaulic for details.

‡ For cut groove systems only. For 14 – 24"/350 – 600 mm Roll Groove systems Victaulic offers the Advanced Groove System (AGS) line of products. Request publication 20.03 for information on the Style W77 flexible AGS coupling.

µ CIS size product is designed with two housings and requires two bolts.

Standard Flexible Coupling

STYLE 77

INSTALLATION

Reference should always be made to the I-100 Victaulic Field Installation Handbook for the product you are installing. Handbooks are included with each shipment of Victaulic products for complete installation and assembly data, and are available in PDF format on our website at www.victaulic.com.

WARRANTY

Refer to the Warranty section of the current Price List or contact Victaulic for details.

NOTE

This product shall be manufactured by Victaulic or to Victaulic specifications. All products to be installed in accordance with current Victaulic installation/assembly instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.

For complete contact information, visit www.victaulic.com

Style 44 Vic-Ring® Coupling

PRODUCT DESCRIPTION

Style 44 couplings are designed with cross-ribbed construction to provide a strong component for use on steel pipe with applied Vic-Ring adapters. Many sizes may be used on pipe with cast shoulders.

Style 44 sizes 4 - 12" (100 - 300 mm) are cast in two segments; 14 - 20" (350 - 500 mm) sizes in four segments; 24 - 36" (600 - 900 mm) sizes in six segments; 42 - 54" (1050 - 1375 mm) sizes in eight segments; and 60" (1500 mm) in 10 segments, to assure concentricity and ease of handling.

Style 44 couplings are supplied with "E" or "T" gaskets. FlushSeal® gaskets are available upon request.

All sizes are supplied painted with alkyd phenolic primer and with plated nuts and bolts.

COLUMN 1 - Victaulic couplings are identified by nominal pipe size.
 COLUMN 2 - Nominal cast shoulder diameter on pipe of AWWA diameter (as per Fed. Spec. WW-P 421b and ASA A21.6 and A21.8).
 COLUMN 3 - Nominal Vic-Ring adapter outside diameter.
 COLUMN 4 - Maximum line pressure, including surge, to which the joint may be subjected, depending upon steel pipe wall thickness and properly applied Vic-Ring adapter.
 COLUMN 5 - Maximum end load from all internal and/or external forces to which the joint should be subjected under working conditions.
 COLUMN 6 - Range of pipe end separation normally available with above couplings.
 COLUMN 7 - Maximum linear movement available at joints made with the above couplings, subject to tolerances (Request 26.01). Movement is the difference between minimum and maximum pipe end separation (Request 26.01 and refer to Linear Movement Tolerance on page 2).
 COLUMNS 8 & 9 - Maximum allowable deflection of pipe from centerline, subject to tolerances (Request 26.01 and refer to Angular Movement Tolerance on page 2).
 † FOR ONE TIME FIELD TEST ONLY, the Maximum Joint Working Pressure may be increased to 1 1/2 times the figures shown.
 § Maximum Pipe will be reduced by Deflection and vice versa.
 ‡ Refer to Design Data for information on tolerances and pipe gap settings.

MATERIAL SPECIFICATIONS

Housing: Ductile iron conforming to ASTM A-536, grade 65-45-12. Ductile iron conforming to ASTM A-395, grade 65-45-15, is available upon special request.

Housing Coating: Alkyd phenolic primer

- **Optional:** Hot dipped galvanized and others

Coupling Gasket: (specify choice*)

- **Grade “E” EPDM**

EPDM (Green color code). Temperature range –30°F to +230°F (–34°C to +110°C). Recommended for cold and hot water service within the specified temperature range plus a variety of dilute acids, oil-free air and many chemical services. UL Classified in accordance with ANSI/NSF 61 for cold +86°F (+30°C) and hot +180°F (+82°C) potable water service. NOT RECOMMENDED FOR PETROLEUM SERVICES.

- **Grade “T” nitrile**

Nitrile (Orange color code). Temperature range –20°F to +180°F (–29°C to +82°C). Recommended for petroleum products, air with oil vapors, vegetable and mineral oils within the specified temperature range. Not recommended for hot water services over +150°F (+66°C) or for hot dry air over +140°F (+60°C).

*Services listed are General Service Recommendations only. It should be noted that there are services for which these gaskets are not recommended. Reference should always be made to the latest Victaulic Gasket Selection Guide for specific gasket service recommendations and for a listing of services which are not recommended.

Bolts/Nuts: Heat-treated plated carbon steel, trackhead meeting the physical and chemical requirements of ASTM A-449 and physical requirements of ASTM A-183.

- **Optional:** Type 316 stainless steel, Grade B-8M, Class 2.

AWWA Grooved Piping Method

Pipe of AWWA dimensions can be joined quickly and easily with the Victaulic grooved piping method. Victaulic products and recommendations conform to ANSI/AWWA C-606, Standard for Grooved and Shouldered Type Joints and CSA 242 M1980.

The groove configuration for ductile (cast) pipe includes a large radius, eliminating sharp corners and stress concentration. This provides stronger beam load capability and higher working pressures for radius grooved systems than available with conventional flanged systems.

FlushSeal® Gasket

The FlushSeal® gasket is designed specifically to seal on ductile iron pipe surfaces. It provides a triple-seal to assure leak-free service for the life of the system.

- 1 Stretching the Victaulic gasket over pipe ends puts the angular lips in immediate and automatic sealing tension.
- 2 Gasket center leg is compressed over pipe ends as coupling is assembled.
- 3 Line pressure automatically strengthens the seal by acting internally on the gasket lips – the higher the pressure, the tighter the seal.

Rigid or Flexible Grooving

Grooving can be done quickly and easily in the field or shop. Standard "Rigid" radius grooving provides the ease of grooved pipe assembly in a rigid joint. The design of the groove and Victaulic coupling draws the pipe ends into contact as the coupling is tightened.

Where flexibility is desirable, "flexible" radius groove dimensions should be used. Flexible grooving provides the added advantages of expansion, contraction and deflection. This is useful to accommodate movement from thermal changes, settling, seismic effect or other causes.

Rigid Radius Cut Groove

Cement Lined Pipe

Flexible Radius Cut Groove

Glass Lined

Exaggerated for clarity

Installed cost savings from 10% to 30%

- Minimal equipment investment
- Fast assembly in tight places
- Clean system. . . no pipe dope or welding slag to contaminate pipes
- Costs are more predictable. . . estimates more accurate

Each joint is a union

- Removal of two couplings permits removal of pipe section for cleaning or servicing
- Easy future add-on, change or renovation of pipe to distribute internal wear from abrasives or slurries
- **WARNING: Depressurize and drain the piping system before attempting to install, remove, or adjust any Victaulic piping products.**

Proven joint reliability

- Full circumferential engagement of housing into groove provides end pull strength
- Couplings available for working pressures to 2,500 psi (17,235 kPa). . . vacuum services to 29.9" Hg

Rigidity or flexibility

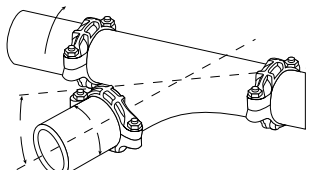

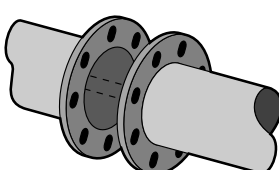

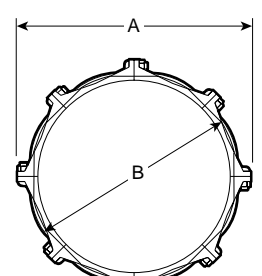

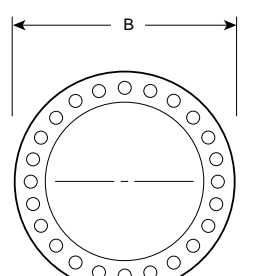

Rigid Radius Cut Groove

- Prevents expansion/contraction
- Ideal for long pipe runs
- Designed for systems with cycling pressure

Flexible Radius Cut Groove

- Allows up to 0.47" of expansion/contraction
- Ideal for uneven surfaces or where settlement is expected

VICTAULIC SYSTEM ELIMINATES ALIGNMENT PROBLEMS

<p>Victaulic Rotates for Alignment</p>	<p>Flanged Must be "two holed"</p>	<p>Victaulic 54" Typical</p>	<p>Flanged 54" Typical</p>
			
<ul style="list-style-type: none"> • Grooved piping can pass through wall sleeves • Special design considerations eliminated • Compression type couplings not required 	<ul style="list-style-type: none"> • Require special design considerations • Flanging must be made-on loose or have coupling adapter added to pass through a wall sleeve 	<ul style="list-style-type: none"> • No two-holing required • No space needed for bolts • 1/3 the weight of flanged systems • Number of bolts greatly reduced 	<ul style="list-style-type: none"> • Two-holing required • Side space needed for bolts • Heavier, more costly to install • More bolts, longer installation time

This product shall be manufactured by Victaulic Company. All products to be installed in accordance with current Victaulic installation/assembly instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.

Zero-Flex® Rigid Coupling

STYLE 07

The unique angle-pad design of the Zero-Flex® Style 07 coupling adjusts to standard pipe and roll or cut groove tolerances, positively clamping the pipe to resist flexural and torsional loads. The wider key section fills more of the groove area.

The Victaulic standard rigid coupling offering for grade “EHP” or “T” gaskets is the Style 107 installation-ready rigid coupling. For all available sizes, the Style 107 is the standard rigid coupling Victaulic supplies in North America for piping systems using Grade “EHP” or “T” gaskets. Contact Victaulic for further details.

Style 07 couplings are rated up to 750psi/5175kPa, dependant on size, for 1 – 12”/25 – 300mm piping systems. Rigid couplings provide rigidity for valve connections, machinery rooms, fire mains, and long straight runs. Support and hanging requirements correspond to ASME B31.1 Power Piping Code, ASME B31.9 Building Services Code and NFPA 13 Sprinkler Systems. Angle-pad design permits assembly by removing one nut/bolt and scissoring housing over gasket. This reduces the number of components to handle during assembly, speeds and eases installation.

For 14 – 24”/350 – 600mm sizes Victaulic offers the Advanced Groove System (AGS) line of products. Request publication 20.02 for information on the rigid W07 AGS coupling.

14 – 24 350 – 600	 For 14 – 24"/350 – 600 mm sizes Victaulic offers the Advanced Groove System (AGS) line of products. Request publication 20.02 for information on the rigid W07 AGS coupling.								

§ Couplings 8, 10, 12"/200, 250, 300mm sizes available to JIS standard. Refer to section 06.17 for details.

* Working Pressure and End Load are total, from all internal and external loads, based on standard weight (ANSI) steel pipe, standard **roll** or **cut** grooved in accordance with Victaulic specifications. Contact Victaulic for performance on other pipe.

WARNING: FOR ONE TIME FIELD TEST ONLY, the Maximum Joint Working Pressure may be increased to 1 1/2 times the figures shown.

† For field installation only on roll grooved pipe or cut grooved pipe. Zero-Flex Style 07 couplings are essentially rigid and do not permit expansion/contraction.

@ Number of bolts required equals number of housing segments.

Metric thread size bolts are available (color coded gold) for all coupling sizes upon request. Contact Victaulic for details.

Style 07 couplings must **not** be used to join PVC pipe.

Zero-Flex® Rigid Coupling

STYLE 07

INSTALLATION

Reference should always be made to the I-100 Victaulic Field Installation Handbook for the product you are installing. Handbooks are included with each shipment of Victaulic products for complete installation and assembly data, and are available in PDF format on our website at www.victaulic.com.

WARRANTY

Refer to the Warranty section of the current Price List or contact Victaulic for details.

NOTE

This product shall be manufactured by Victaulic or to Victaulic specifications. All products to be installed in accordance with current Victaulic installation/assembly instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.
