

PREMIER ENGINEERED & PRO SERIES

XTRU-THERM®

PRE-INSULATED PIPE SYSTEM

PARTNERS IN EXCELLENCE

XTRU-THERM PROTECTION

Pre-insulated pipe systems provide users with many advantages when compared to traditional, field-applied insulation solutions. Greater thermal efficiency, excellent mechanical performance, lower installation costs, and high-quality factory-applied materials significantly lower total installed costs. As a result, there has been increased use of pre-insulated pipe systems in various industries, such as oil & gas, district heating & cooling, environmental, and industrial.

These advantages, as well as having an expertly designed pre-insulated pipe system, are why you should specify XTRU-THERM®. XTRU-THERM is the Premier Engineered Series pre-insulated pipe system to meet all of your project needs.

XTRU-THERM PERFORMANCE

As the latest Premier Engineered Series pre-insulated pipe system, XTRU-THERM consists of thermally efficient polyurethane (PUR) insulation, a waterproof high-density polyethylene (HDPE) outer jacket, and a service pipe to meet challenging project requirements. Fabricated in a quality-controlled ISO 9000 facility, XTRU-THERM offers:

- Polyurethane insulation free of voids and fully bonded to the pipe and jacket for consistent thermal performance over the system's design life
- A watertight outer jacket preventing corrosion under insulation (CUI) and the associated high costs of inspection, repair, replacement, and downtime caused by pipe corrosion
- Long-term reliability, consistent materials, and fabrication that minimize damage during construction and operation to maximize your return on investment

XTRU-THERM FEATURES

- Operating temperatures from -320 °F (-196 °C) up to 250 °F (121 °C)

- Typical compressive strengths up to 90 psi (620 kPa) to prevent damage during construction and operation. Higher compressive strengths are available
- Typical thermal conductivity down to 0.16 Btu in/hr·ft²·°F (0.023 W/m·°C)
- Versatile system fabricated in various thicknesses and densities to meet the overall heat transfer design parameters
- Aluminum diffusion barrier is applied to prevent cell gas from dissipating out of the insulation layer and decreasing thermal efficiency
- End finishing can be a square cut or a wind-down end seal configuration preventing water ingress
- Pipe fittings and fabricated parts can be insulated using a seamless molded casing or an extruded welded casing
- Optional heat tracing systems to maintain fluid temperatures for maximum flow assurance
- Optional PermaAlert® leak detection system to detect moisture in the system which may result in decreased thermal efficiency and creating a corrosive environment
- Optional anti-corrosion coatings applied to the surface of the pipe to prevent corrosion

XTRU-THERM SOLUTIONS

XTRU-THERM provides long-term insulation for hot and cold liquids, above or below ground applications that comply with industry specifications to ensure quality, consistency, safety, and efficiency. Solutions are available for a wide range of operating temperatures and environments to serve various industries, such as oil & gas, district heating & cooling, environmental, and industrial.

PERMA-PIPE offers turnkey services to meet operational and project challenges beyond the piping system that our clients have come to trust. We provide project planning, engineering support for system construction, design assistance and calculations, project management, pre-fabrication services, and field service training certification to reduce your installation, environmental, and safety concerns from start to finish of a piping project. Our extensive track record of successful global projects will showcase our experience.

XTRU-THERM[®] OPTIONS

Premier Engineered Series:

Carrier Pipe, Polyurethane Foam, Aluminum Diffusion Barrier, Anti-Corrosion Coating, and Outer Jacket

Pro Series:

Carrier Pipe, Polyurethane Foam, Aluminum Diffusion Barrier, and Outer Jacket

Optional Anti-Corrosion Coating and PermAlert[®] Leak Detection System

Carrier Pipe Options:

Available in many different pipe materials

Applications:

Oil & Gas
District Heating & Cooling
Environment
Industrial

[Please see datasheet for XTRU-THERM specifications at permapipe.com]

PARTNER WITH PERMA-PIPE

PERMA-PIPE International Holdings, Inc. (NASDAQ:PPIH) is a global engineered pipe services company offering core competencies in anti-corrosion coatings, insulation solutions, containment systems, leak detection systems, engineering support, field service, and custom fabrication.

When you do business with PERMA-PIPE, you are partnering with a company that has served the industry for over 100 years and has vast experience in all the markets we serve. You are not just buying a long-lasting, reliable piping system; you are also investing in a partnership with a company that stands behind its products and services while providing lasting peace of mind.
